Dr. C. E. Hemingway

Physician and Surgeon,

Corner W. Lake st., and N. 48th ave.

Office Hours { 9 to 10 a. m. / 7 to 8 p. m.

Telephone West 1003.

—Dr. C. E. Hemingway of Oak Park has opened an office at northwest corner Forty-eighth avenue and Lake street, over the Moreland Pharmacy. The doctor comes highly recommended, he having assisted some of the leading surgeons in this city in a great number of operations, also having studied in some of the best and largest hospitals in Europe. Dr. Hemingway is also the inventor of a new surgical instrument which has been eagerly sought for by the profession and highly endorsed by them. We predict a brilliant future for the doctor and he will no doubt build up an extensive practice between Moreland and Oak Park.

avenue.

Ogden Times June 12, 1896.

Dr. C. E. Hemingway has opened an office at 105 North Oak Park avenue for the practice of his profession. After graduating from our high school, Mr. Hemingway spent three years at Oberlin and then completed the full course at Rush Medical College. Last summer he spent in medical studies in Europe and altogether the Doctor has had a thorough preparation for his profession, in which we predict for him a large measure of success.

In this connection the following from the Times-Herald of May 29, will be of interest: "C. E. Hemingway, M. D., who received his diploma yesterday with the graduating class of Rush Medical College, is the inventor of a surgical instrument which is highly praised by Dr. Nicholas Senn and other surgeons, whose commendation is of great value. The instrument is a laminectomy forceps for making incisions in backbone. Dr. Hemingway was at work on his idea during his last six months at Rush College, and succeeded in perfecting the instrument so that it could be used at the faculty and alumni clinic held several days ago. Its efficiency was immediately recognized by all the doctors in attendance."
